Subject: FW: RTOC Superfund Updates

Ben,

The attached file contains your revisions on the draft (except as noted in the email below). If the revisions are acceptable, please forward the document to Ronnie for his review. Please note, Randy Gee has requested the Superfund RTOC Update by June 22nd.

Thanks

Subject: RTOC Superfund Updates

I spoke with Petra and she said the PRP is finalizing the work plan and activities to start summer 2018. I made the changes. I also added back in the Brownfields paragraph for Santa Clara Pueblo. I did look at the previous RTOC update and the information is slightly different. Also, the conference call with Santa Clara in March 2018 was after we had already completed the update report for the April RTOC (previous update was done March 13). The Phase II and communications have been ongoing. But if you think it is still necessary to take it out, then do so.

Let me know if you have any questions.
